

ACCUTRADE CORE

Turn more website visitors into trade-ins

Start generating ready-to-close trade-in leads from your website when you add the industry's **most accurate appraisal engine.**

34% more accurate than KBB and Black Book¹

Generate exact offers on *any* vehicle

Layered with our proprietary Cars.com® and Galves® data, AccuTrade Core goes beyond your local market signals to deliver precise values on *any* vehicle, including **EVs, exotics, classics, collectors, and 100K+ mile cars.** Give your team the confidence to pursue every website trade-in opportunity, no matter how rare.

Simplify your sell experience

With the latest version of AccuTrade Core, we simplified the UX to convert website visitors in just two steps: the user enters their license plate or VIN number to prepopulate their vehicle details, and then they submit their contact info for an instant offer. It's that simple, and dealers are seeing serious results from the update.
