

# Cars for Sale

With Google's "Cars For Sale" feature, Apollo Ads will ensure your new and pre-owned inventory is listed on your Google Business Profile, giving online shoppers an instant preview of the cars available on your lot. Google users can then search, filter, and easily learn more about cars for sale, further directing customers to your dealership. Every listing includes pricing, vehicle details, key features and imagery. Plus, the listings are automatically updated to reflect any changes in inventory.
